Division of Oil, Gas and Mining  
3 Triad Center, Suite 350  
Salt Lake City, Utah 84180-1203

Dear Mr. Hedberg:

Please find enclosed a copy of the correspondence in our files for Notice of Intent number UTU-66234. This information was recently requested by your office. It is our understanding from the attorney for Western Sulphur that the companies have not yet worked out their financial conflicts. Consequently there has been no work on the ground for the last several years.

The area would warrant inspection if you are in the area. Disturbance appears to be over five acres in size, although most is said to have been accomplished in the 1960's.

Please contact Gina Pack in this office if you require further information or if you would like to visit the site.

Sincerely,

*Arthur L. Tait*

Dear Joe:

Thank you for contacting this office regarding the Cina Mine in Iron County, Utah. We understand that the mineral rights to this property are still being negotiated between your company and Western Sulphur. Please contact Gina Pack at this office once ownership has been determined.

Enclosed are a copy of the regulations regarding surface disturbance of mining claims on public lands and two pictures of the property. We look forward to working with you in preventing unnecessary and undue degradation of our public lands.

Sincerely,

Arthur L. Tait  
Area Manager

Dear Mr. Day:

Thank you for the information regarding your Brimstone mining claims and your proposed work in the area of the Cina Mine. According to our conversation, the work proposed in these Notices of Intent was not accomplished.

This letter will serve to close file UTU-67011, and the Notice you submitted contained in UTU-66234. A new Notice of Intent or Plan of Operation will need to be submitted at least 15 days before initiation of any new ground disturbance on public lands.

We appreciated your efforts to inform this office of your mining and exploration activities.

Sincerely,

*acting*

Dear Sirs:

We have recently been examining all of the open Notices of Intent to conduct mining operations in our files. The Notices of Intent submitted by your company for the Cina Mine area in Beaver County, Utah were inspected, and it appears that no reclamation of the land has occurred. It also appears that the work done exceeded that described in the Notices.

Please contact our area geologist, Gina Pack, to discuss these problems. It is imperative that you work with us in performing the necessary reclamation. Please find enclosed a description of the reclamation standards.

We look forward to working with you in restoring our public lands.

Sincerely,

Arthur L. Tait  
Area Manager

## OUTLINE FOR PLAN OF OPERATION

SUBMITTED UNDER THE

43 CFR 3809 REGULATIONS

### I. CLAIMANT INFORMATION:

A. Western Sulfur Equity Corporation

5916 West Pierce, Phoenix, Arizona 85043 (602) 233- 3692 )

### II. OPERATOR INFORMATION:

A. Day Mining Co.

3550 Paradise Rd. Suite 254 Las Vegas, Nevada. Z- 89109

### III. MINING CLAIM INFORMATION:

A. CINA lode mining claims 1 Thru 9

B. S.N.

D. T - 31 So. R - 15 W. Secs. 5 & 6

E. Iron County, Utah.

F. Map of mining area included.

G. We will start the five acrea mining operation on Cina claims 1 & 2

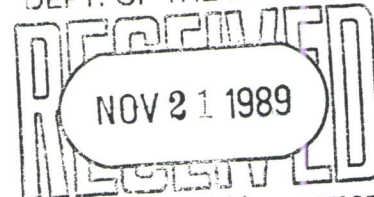

### IV. PROPOSED OPERATION:

A. PERIOD of operation ( Beginning on the 10 day of november, 1989, and  
and completing on a five year peroid with an extension if ore is  
stiiil being extracted from the said claims.

B. Access roads and existing access route off of state highway 56, 31  
miles West of Cedar City, Utah. To LUND R.R. siding thence 18  
miles north on county road to the Cina Mine. ( See inclosed topo map.

C. Existing disturbance and structures. (There has been extensive  
excavation of overburden to open up a mining operation to extract  
ore by the open pit mining metheod , I will take photographs of  
existing desturbances and submit them to the B.L.M. and State

DEPT. OF THE INTERIOR

Bureau of Land Management  
Beaver River Resource Area

of Utah. Day Mining will not be responsible for the previous disturbances prior to our lease with Western Sulpur Equity Corporation, Day Mining Co. will be held responsible only for each five acres we disturb, and will reclaim said acres.

D . The proposed operation will cover less than (5) Acres on the unpatented mining claims known as the CINA # 1 & 2, marked on the claim map, the map will be submitted to the B.L.M. and the state of Utah. This is a dipping vein of sulfur the sulfur is exposed on the surface of the said claims, the sulfur ore will be loosened with a tract drill and compressor and loaded into trucks with a rubber tired front end loader. Trucks will use existing access roads ( see topo map ) to move ore ( Sulfur ) to the crushing and processing plant located at Lund R.R. siding, existing roads are approximately eight ( 8 ) feet wide Day mining Co., would like to extend the width to eighteen ( 18 ) feet where needed to allow trucks to pass each other on their haulage route, this will be an open pit mining operation, equipment used 1 - D 8 Cat., 1 - 966 cat rubber tired front end loader, trailers houses for structures on the mining site,

PROPOSED RECLAMATION :

A . We will reclaim all areas disturbed by Day Mining Co., to standards described in section 3809. 1 - 3 (d) of 43 CFR 3809 regulations and reasonable measures will be taken to prevent unnecessary or undue degradation of the land during our mining open pit mining operation on the said claims.

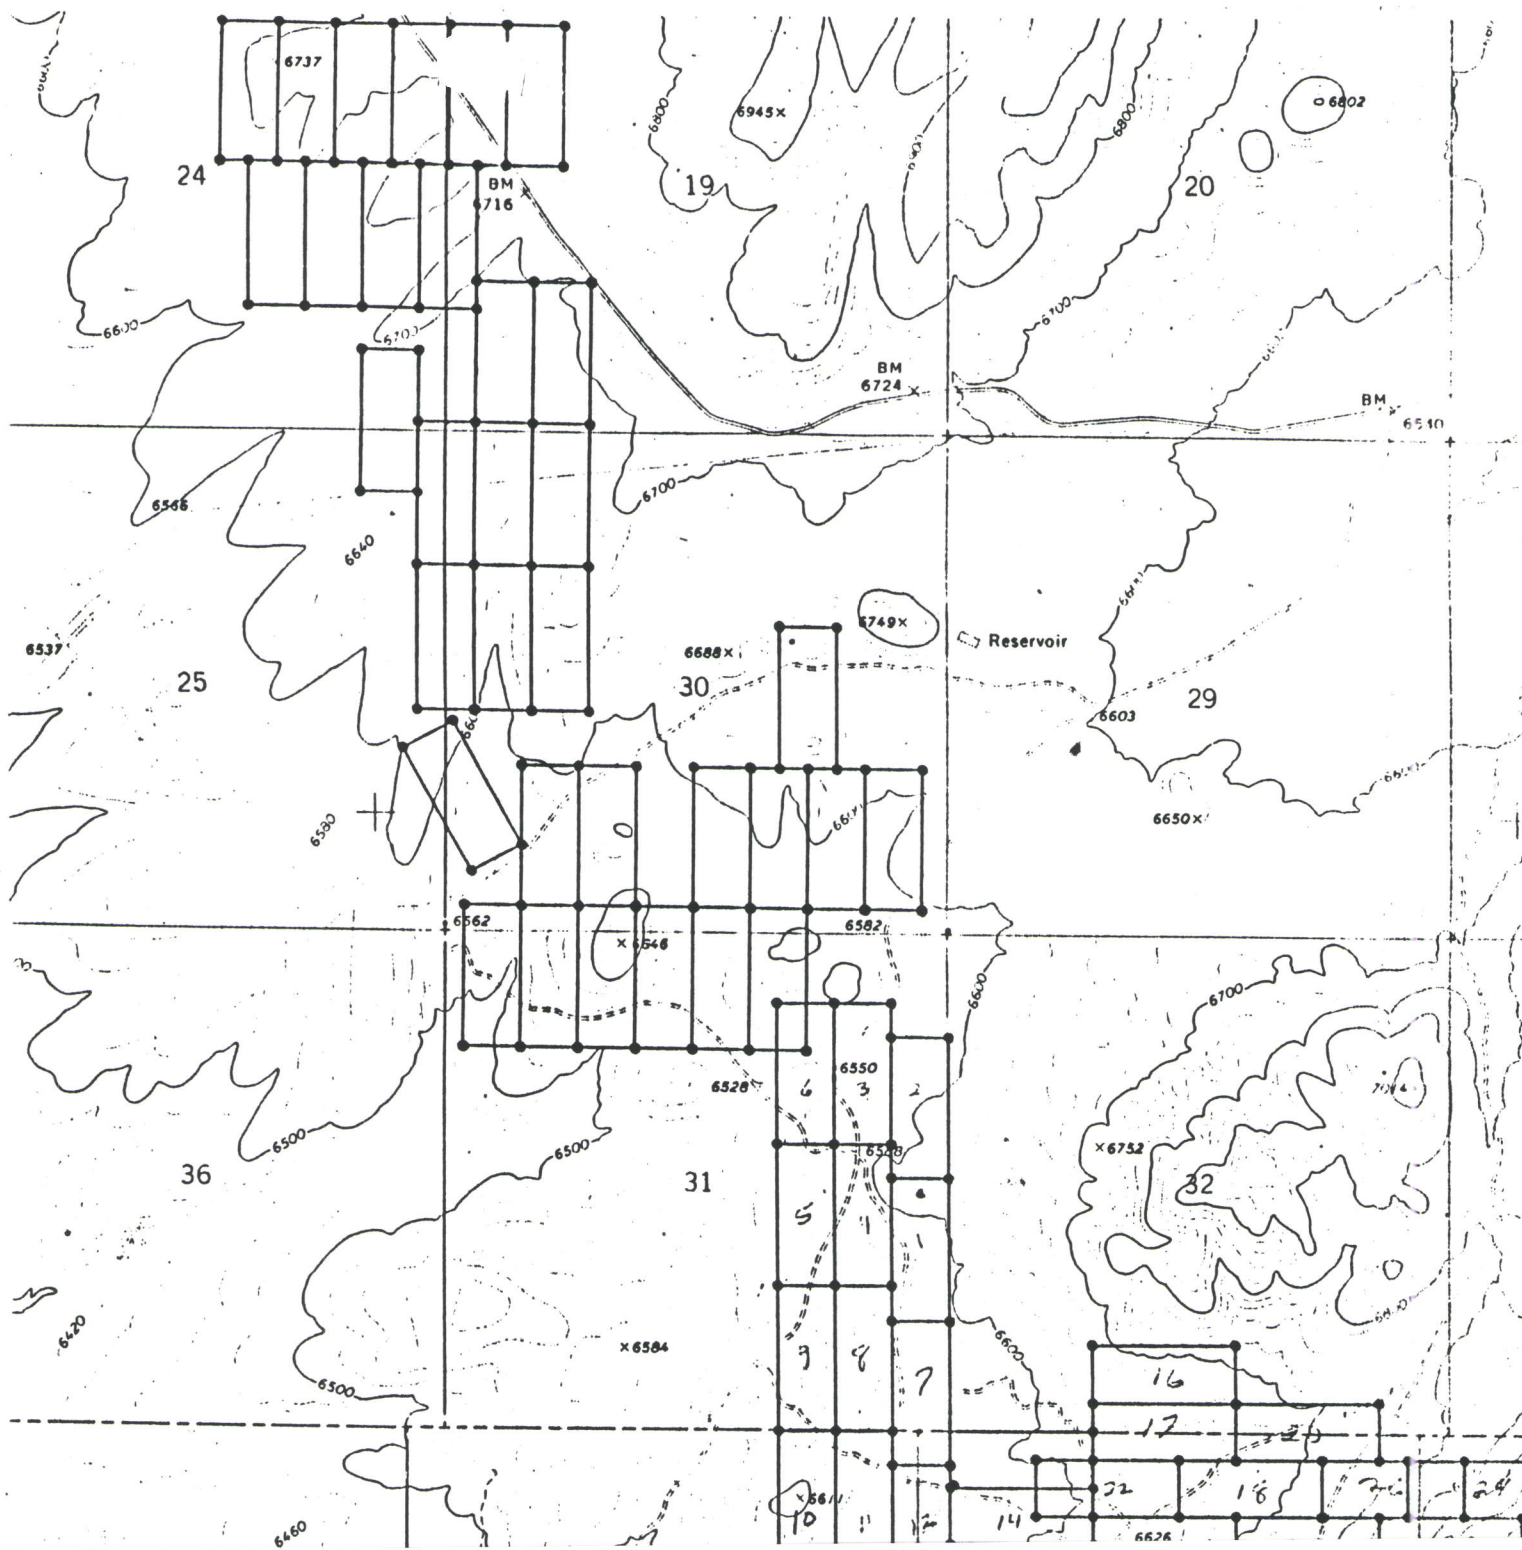

All cuts or ledges will be sloped and contoured and genuine attempt will be made to improve the present overall appearance.

Day Mining will locate 8 mill sites on B L M ground at the Lund siding, the said mill sites will be used for crushing plant, and for stockpiles of sulfur, and loading facilities onto R.R. Cars, and for trucks for highway transportation to product consumers west coast markets.

Day Mining Co. will not be held responsible for any disturbances on the CINA mining claims prior to date of a mining lease signed between Day Mining Co. and Western Sulfur Equity Corp. 5916 West Pierce Phoenix Ar. 85043. We will be held responsible for the acres we disturb.

Yours truly  
Jack D. Day ( Day Mining Co. )

October 31. 1989

To: Assistant District Manager for Resources, Cedar City  
From: District Geologist  
Subject: Western Equity Sulfur's Cina Mine 3809 Notice

On October 2, 1989 the district office received a notice of intent from Western Equity Sulfur Corporation to conduct exploration and development activities associated with the Cina Mine in T.31S., R.15W., Section 5, SLB&M. The disturbance was to be limited to the main pit area and existing roadways. The Notice was sent to the BRRA for review.

On October 20, 1989, Dave Everett received a telephone call from an anonymous person concerning Western Equity Sulfur's activities at this site. The caller stated to Dave his belief that the disturbance by Western Equity at the site far exceeded the 5 acre limit of the Notice. He further stated that the sulfur was being marketed by Western Equity as a fertilizer and that he was concerned since he had seen analytical reports showing the sulfur contained mercury.

On the same day as the telephone call, October 20, Dave and I went to take a look at the operation. It appears that surface disturbance at the site exceeds that proposed in the Notice by a considerable amount and probably exceeds the 5 acre limit for a notice by a considerable amount. Much of the disturbance appears to be directly related to bulldozer work, primarily blading of new roads and cuts for exploration work. The disturbance appears to be very recent and dozer tracks are still fresh and highly visible. During our brief visit, we observed that very recent road-blading and trenching has taken place in sections 5, 7, 8, 31, & 32 in the vicinity of the Cina Mine. Some of the road-blading also appears to be unnecessary. In one case a road was bladed to a mining claim monument and another road was bladed back out along side the first road.

Available reports for the Cina Mine indicate considerable amounts of both sulfur and mercury. According to the reports, the sulfur and mercury occur as separate deposits and with careful mining can be kept separate.

On October 23 I called Wayne Hedberg of the Utah Division of Oil, Gas & Mining to discuss Western Equity Sulfur's operation. Wayne said he had not seen anything filed by Western Equity with the State but that he would check and prepare a letter to them in the

event they had not. I then called Sheridan Hansen at BRRA and related to him all the above information. I suggested to Sheridan that he immediately contact Western Equity Sulfur and notify them that the BLM has reason to believe that they are in noncompliance with the 43CFR3809 regulations and that we want to meet with them at the site to discuss their operation.

Western Sulphur Equity Corporation  
5916 West Pierce  
Phoenix, Arizona 85043

Dear Sirs:

Re: Notice of Intent to Conduct Mining Operations, Cina Mine Properties, Iron County, Utah

It has recently come to our attention that you are proposing to conduct sulphur mining operations on the old "Cina Mine" properties located in portions of Section 5, T31S, R15W, Iron County, Utah. Although you have filed a Notice of Intent with the BLM, State law also requires that mining-related activities be processed through this office. Enclosed is a copy of the State rules and regulations applicable to mining operations on all lands within the state of Utah. I have enclosed copies of our application forms to assist you in filing your notice with this office. A copy of the BLM notice may suffice, provided it contains all of the information required by our rules. If your present activity goes beyond 5 acres of surface disturbance (including access roads), you will need to file a Notice of Intent to Conduct Large Mining Operations, Form MR-LMO, and post a reclamation surety.

It is our understanding that the sulphur deposit within the vicinity of your proposed operations may contain significant proportions of metacinnabar/cinnabar. Please provide information regarding your processing and/or refining plans for the sulphur and how this might increase the likelihood of a release of mercury into the environment.

If you have any questions or need further assistance, please do not hesitate to contact me at 538-5340.

Sincerely,

D. Wayne Hedberg  
Reclamation Supervisor/Permit Lead

Dear Sirs:

This letter is to notify you that your Notice of Intent to conduct mining activity on the Cina, Kim, and Neptune claims has been received.

Based on the information submitted, your proposed action appears to be in conformance with mining laws and regulations. You may proceed with the proposed work.

You are requested to provide notice at this office when the proposed work is completed. A compliance check of the work will be made at that time.

Your notice has been assigned the number BRRA-90-046-11N. Please refer to this number when making reference to this notice.

Sincerely,

/s/ SHERIDAN G. HANSEN

## NOTICE OF INTENT

TO ALL WHOM THIS NOTICE SHALL COME, GREETINGS:

Pursuant to 43 C.F.R. Section 3809, WESTERN SULPHUR EQUITY CORPORATION submits its notice of intent to operate, limiting its disturbance to five acres or less, as follows:

1. The name and address of the mining claimant and operator is: WESTERN SULPHUR EQUITY CORPORATION at 5916 West Pierce, Phoenix, Arizona 85043. Please send notice also to J. BRYAN JACKSON, 111 North Main, Cedar City, Utah 84720.

2. The mining claims all the Cina Mine claims in Iron and Beaver counties, State of Utah, more particularly described in attached Schedules "A" and "B." The disturbance will be limited to the main pit area and existing roadways, as identified in Figure 1, attached hereto.

3. The activities and operations shall consist of excavation, stockpiling, exploration and development together with the maintenance and, if necessary, improvement of the existing roadway to allow for the transportation of equipment and ore. All testing and stockpiling shall be contained within the disturbed area.

4. Reclamation of all areas disturbed will be done in accordance with and to the standard described in 43 C.F.R. Section 3809.1-3(d), which briefly shall include the following:

(a) Access shall be maintained along the existing route for only the minimum width needed for operations and shall follow the natural countours where practicable to minimize cut and fill. It is anticipated that at least one three foot culvert will have to be put in.

(b) All tailings, dumps, deleterious materials or substances and other waste produced by the operations, if any, shall be dispersed of so as to prevent unnecessary or undue degradation in accordance with Federal and State Laws. It is anticipated that all stockpiling and testing will be contained within the disturbance area through construction of bar pits and pads.

(c) At the earliest feasible time, this operator will reclaim the area disturbed, except to the extent necessary to preserve evidence of mineralization by taking reasonable measures to prevent or control on-site and off-site damage of the federal lands.

(d) Reclamation shall include, but not be limited to:

(1) Saving of topsoil for final application after reshaping of disturbed areas have been completed;

(2) Measures to isolate, remove, or control toxic materials, if any;

(3) Measures to control erosion, landslides and water runoff, if any;

(4) Reshaping the area disturbed, application of the topsoil and revegetation of disturbed areas, where reasonably practicable; and

(5) Rehabilitation of fisheries and wildlife habitat.

It is the operators intent to commence operations within the next Thirty (30) to Sixty (60) days from the date hereof, unless this operator receives written notice of your disapproval as provided by 43 C.F.R. Section 3809.1-3.

DATED this 29th day of September, 1989.

  
BRYAN JACKSON  
General Counsel

Dear Mr. Jarvis:

This is to notify you that this office has received your Notice of Mining Operations in the Wah Wah Mountains Area. Your Notice has been assigned the number BRRA-88-040-6N.

Please refer to this number when making inquiries concerning this Notice. Please contact this office upon completion of your operations so that an inspection can be made of your reclamation work.

If you have any questions concerning this matter, please feel free to contact this office. Thank you for helping to manage our public lands.

Sincerely,

*SCA*!s/Sheridan C. Hansen!

**Activity:**

May 2, 1988 to September 1, 1988

Core drilling with one rig at depths of 150-500 feet at 30 sites. The access, for all traffic, will be via existing county and BLM roads to the Cina Mine. The drill rig will then use the numerous roads and trails, constructed over the years as part of the annual assessment program, to gain access to the drill locations. This network of roads facilitates access to all of the mining claims in the area. The only surface disturbance will be to clear and level the drill sites. A previously disturbed, level, open area near the Cina Mine will be utilized for storing supplies and equipment.

See attached map for location of proposed drill sites.

**Reclamation:**

The drill pads will be reshaped to comply with the natural contours. All of the drill pads will be covered with the resident topsoil materials, planted with an appropriate diverse seed mixture, and hand-raked to cover the seed. The seeding will take place after operations in the late summer or fall seasons. The trash and other incidental debris will be removed from the site.
